

DCS Implementation Services

Your systems need as much care and attention during setup and commissioning as they do during routine maintenance. At INTECH, we offer comprehensive system implementation services covering software design, hardware testing, compliance, and commissioning support. Our services cover all distributed/process control, safety, and fire & gas systems from major vendors worldwide.

Efficient Implementation & Testing

Services Offered

We have extensive expertise on industrial control systems, backed by 30+ years of project expertise and a team of 250+ engineers. The services we offer are a testament to our commitment to quality and efficiency in your projects' execution.

Programming

- ▶ Software programming
- ▶ Documentation
- ▶ HMI design
- ▶ Verification and implementation

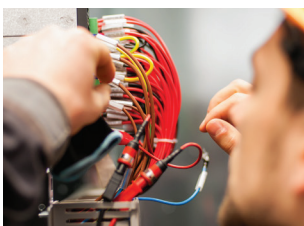

Testing & Commissioning

- ▶ Factory Acceptance Testing
- ▶ Standards compliance
- ▶ Site Acceptance Testing
- ▶ Commissioning support

Why Choose Implementation

We understand that certain situations make it difficult to maintain an in-house engineering team or have enough availability with facilities personnel to have dedicated commitment on a project. Our services help ensure you don't lose revenue or suffer a loss in productivity due to a shortage of resources.

Need Owner's Engineers?

- ▶ Save on retention costs
- ▶ Have all the benefits of in-house engineering
- ▶ Get full commissioning support
- ▶ Get multi-vendor expertise

Need Outsourcing?

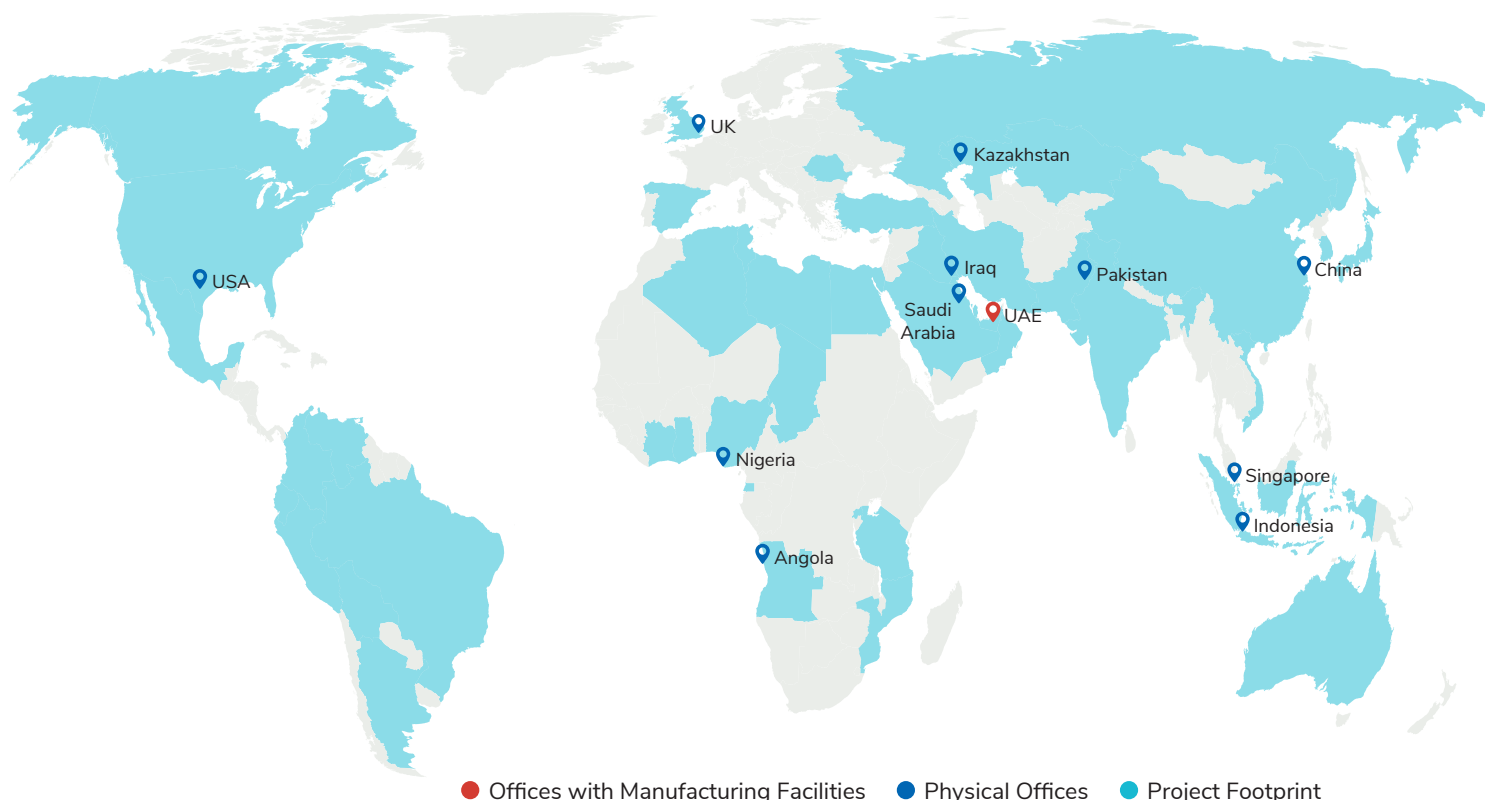

- ▶ Save on OEM engineering costs
- ▶ Get multi-vendor services in one go
- ▶ Off-site staging and testing
- ▶ Detailed documentation and support

INTECH's vendor-agnostic approach to instrumentation and control systems enables clients to use fit-for-purpose components without compromising on quality, value, and most importantly, inter-operability

What Differentiates INTECH

- ▶ Creating optimum DCS design to take advantage of the most beneficial DCS attributes that are essential for your processes.
- ▶ Reducing clutter by getting rid of options, setpoints, and tags that are not relevant to your processes and therefore would never be used.
- ▶ Creating optimized architectures that maximize the cost savings of modular plant design
- ▶ Working closely with DCS vendors for production of complete hardware packages

Our systems are designed for easy scalability with multiple hardware options to meet your immediate and future expansion needs

About INTECH Process Automation

For 30 years, INTECH has been helping industrial businesses enhance process visibility, control, and reliability in their industrial plants and assets. Now, in a rapidly evolving digital world, we are here to partner with you in bringing out the best your facilities have to offer through full enterprise visibility and AI-based insights and analytics
