

Revolutionize Your Power Distribution with  
Intech's Durable and Reliable E-Houses

## OUR OFFERINGS

### Flexible component options

A wide range of options available for LV and MV switchgear, VFDs, transformers, AC/DC UPS batteries with battery rooms, PFIs, and NER,

### Adaptable design

Customizable to fit project needs, including container size, internal layout, configurations, and vendors.

### Lifecycle services

Provide swift project delivery and reliable operations, including installation, testing, commissioning, and after-sales support.

### Safety concerns

Advanced HVAC, F&G, fire suppression, and VESDA/HSSD systems to protect against electrical fires and other hazards.

## WHY CHOOSE US:

Intech's E-houses are a revolutionary solution for power distribution that offers convenience, reliability, and adaptability. These prefabricated containerized centers are designed to withstand harsh conditions and provide reliable power distribution for critical operations. Our E-houses

have advanced electrical systems, including transformers, switchgear, and control panels, all housed in durable and secure containers.. Easy transportation and installation of these units with a compact design make them an ideal choice for remote locations or short-term projects.

### ***One-stop Solutions for Automation, Control, and Power Systems***

*Customizable hybrid and standalone electrical buildings and skids with electrical systems and bundled automation, control, and instrumentation systems*

## ABOUT US WHO WE ARE

IINTECH Process Automation is a globally renowned system integrator and industrial automation company. For nearly 30 years we have helped major oil & gas companies solve their most pressing issues of instrumentation, control, and electrical automation. INTECH's diversified automation solution portfolio, technical skills, knowledge, and expertise on equipment from all major OEMs, and our asset-application specific approach to solution design are what differentiates us from a typical system integrator.

## INTECH'S ELECTRICAL SOLUTION

*Greenfield projects are often executed in challenging conditions with limited access to energy and infrastructure. INTECH is a system integrator who understands these constraints and provides electrical and power solutions alongside its automation and control solutions for a comprehensive project delivery experience in any global location*

## Key Highlights

### COMPACT SIZE:

With a compact design, these E-houses are an ideal choice for remote locations or short-term projects where space is limited.

### EASY INSTALLATION

Reliable power distribution for critical operations, these E-houses are an ideal solution for all power distribution needs.

### ADAPTABILITY

Tailored to accommodate specific power distribution requirements, highly versatile for a variety of applications.

Do not hesitate to get in touch with us if you require a power distribution solution to find out more about how our e-houses can satisfy your requirements.
