

Field Services

Keeping your production high and maintenance low

A culture of excellence featuring skilled personnel, decades of global experience, and thousands of man-hours on all types of facilities across Oil & Gas streams

Multiple expansions, modifications, and upgrades often results in diverse installations of multiple systems and technologies. Services for such facilities are best covered through a team with multi-vendor expertise and a history with the installation,

modification, and maintenance of such facilities. With our successful project history with major oil & gas companies around the world, we are well equipped to handle any degree of O&M complexity.

Pneumatic Systems

Multi-Vendor Experience

What Differentiates INTECH

125,000 plus man-days of services experience

A million plus hour without a work-related lost time injury (LTI)

O&G domain expertise

Global support with 200+ automation specialists & other SME

Qualified Workforce (Averaging 10+ years of experience)

Dedicated management team ensuring customer satisfaction

Customer focused competency development and T&D

Bespoke nationalization programs

Reduce Operational Costs

Global logistics, visas & deployment

End Users

Executing services contracts for maintaining all ICSS install-base of our customers

About INTECH Process Automation

For 30 years, INTECH has been helping industrial businesses enhance process visibility, control, and reliability in their industrial plants and assets. Now, in a rapidly evolving digital world, we are here to partner with you in bringing out the best your facilities have to offer through full enterprise visibility and AI-based insights and analytics
